SHAHZAIB

AI ENGINEER & AUTOMATION SPECIALIST

Email: 2023-uam-2189@mnsuam.edu.pk **WhatsApp:** +92 3325162511

LinkedIn: linkedin.com/in/shahzaib-ahmad-16443b430

PROFESSIONAL SUMMARY

AI Engineer and Automation Specialist focused on building practical, intelligent systems and modern digital solutions. Expert in combining artificial intelligence, machine learning, workflow automation, and software development to turn real-world business requirements into reliable, scalable products. Proven track record in designing useful and efficient solutions across LLM-powered applications, RAG systems, predictive analytics, computer vision, n8n automation, and full-stack web applications.

CORE EXPERTISE & TECH STACK

AI & MACHINE LEARNING

Machine Learning, Deep Learning, NLP, Python, Scikit-learn, Predictive Modeling, Computer Vision

GENERATIVE AI & LLMS

LLM Applications, RAG Systems, AI Agents, AI Chatbots, Prompt Engineering, Conversational AI

AI AUTOMATION

n8n, Workflow Automation, API Integrations, Business Process Automation

DATA & ANALYTICS

Data Analysis, Data Cleaning, Data Visualization, Pandas, NumPy, SQL

SOFTWARE & WEB DEVELOPMENT

React, TypeScript, JavaScript, HTML, CSS, Node.js, REST APIs, SQLite, CRM Development

PLATFORMS & TOOLS

Git, GitHub, Docker, Google APIs, VS Code, Vite, Netlify

PROFESSIONAL EXPERIENCE

AI Engineer | ML Engineer | AI Automation — HAT Tech Media — **3 Months**

- Worked on AI engineering, machine learning, and AI automation solutions to solve complex operational challenges.
- Gained hands-on practical experience in architecting intelligent systems, LLM integrations, and automated business workflows.
- Developed reliable machine learning pipelines and optimized automated workflows for digital scalability.

FEATURED PROJECTS & SYSTEMS

AI Startup Success & Failure Prediction System

AI / ML • Data Analytics • Predictive Modeling

- Engineered an AI/ML predictive system designed to analyze business and startup-related dataset parameters.
- Applied machine learning algorithms to assist stakeholders in evaluating potential venture success or failure risks.

Phantoms Workspace AI Chatbot

Conversational AI • LLMs • Chatbots

- Developed an intelligent conversational AI chatbot for Phantoms Workspace to provide instant user support and query resolution.
- Utilized modern LLM architectures and tailored prompts to deliver highly accurate, context-aware responses.

AI Pothole Detection System

Computer Vision • Real-Time AI • ML

- Built a computer vision system that accurately detects potholes and road anomalies from static images.
- Engineered live stream processing capabilities to enable real-time pothole detection via camera feed.

AI MultiPlatform Content Automation

n8n • AI Automation • Content Pipeline

- Architected an n8n-based automation workflow generating short-form video content with synthetic voice and subtitles.
- Automated end-to-end content distribution and scheduling across multiple social media platforms seamlessly.

AI Index Doctor

AI Diagnostics • SEO Analytics • Search Indexing

- Created an AI diagnostic tool analyzing website blog content to diagnose search engine indexing issues.
- Generated automated SEO remediation suggestions and actionable insights to improve indexing rates.

LeadFlow CRM

CRM Development • Google APIs • Web Systems

- Developed a modern CRM system managing leads, team members, scheduling, and business workflows.
- Integrated Google API services for automated meeting synchronization and streamlined lead tracking.

HarborPeak Commerce — E-Commerce Partnership Website

Web Development • HTML/CSS/JS • Netlify

- Designed and developed a professional e-commerce partnership website for HarborPeak Commerce.
- Built responsive sections covering e-commerce operations, Shopify store management, marketing, and partnership services.
- Implemented modern navigation, compliance information, FAQ, consultation CTAs, and deployed on Netlify.
